

JACKS AND STANDS

LASTING JACKS

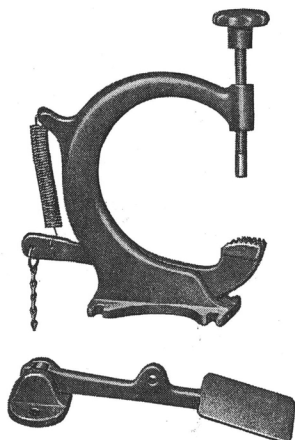

JZS 7—Low Toe and Heel Rests

JZS 8—High Toe and Heel Rests

The most popular of all jacks for lasting and bottoming operations. Contains all necessary adjustments and can be swung in any direction. A 42-inch wood mounting post, JZS 8-23, complete with bolts and nuts, is included only when specified.

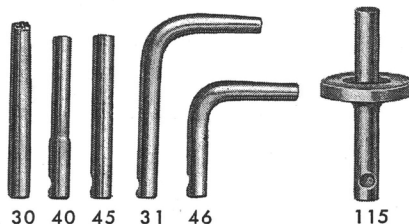

WOOD HEEL COVERING JACK

JZS 156

The most practical device for wood heel covering operations. Adjustments for various heights are quickly made and the heel is inserted or released by slight pressure on the treadle. Will take heels up to 26/8.

LAST PINS

All pins have a $\frac{7}{16}$ -inch diameter base to fit lasting Jacks and Stands.

LP 30—Tapered to $\frac{3}{8}$ -inch diameter. $3\frac{3}{8}$ -inches long.

LP 40—Reduced to $\frac{3}{8}$ -inch diameter above the shoulder. Length above the shoulder, 2-inches. Overall length, $3\frac{1}{8}$ -inches.

LP 47—Like LP 40 but shorter for small lasts. Length above shoulder, $1\frac{1}{4}$ -inches. Not illustrated.

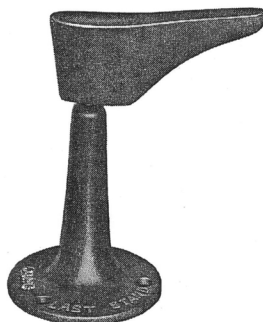

LP 45— $\frac{7}{16}$ -inch diameter its entire length for large last thimbles. $3\frac{1}{8}$ -inches long.

LP 31—Long bent pin, 90° angle, tapered to $\frac{5}{16}$ -inch diameter.

LP 46—Short bent pin, 90° angle, tapered to $\frac{5}{16}$ -inch diameter.

LP 115—Similar to LP 45 but with collar for Slide-O-Matic Lasts.

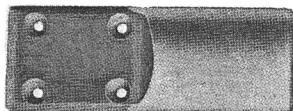

WOOD HEELERS' LAST

JZS 132

A heavy cast iron last on which to hold the shoe while fitting the wood heel. Last stand not included.

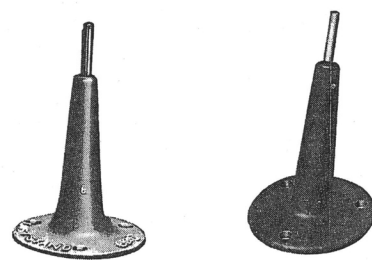

OXFORD TURNING IRON

JZS 119

Attached to edge of bench, this device provides a perfect surface for quick fitting around backseam of shoe. Round-ed surface, $3\frac{1}{2}$ -inches long.

BENCH LAST STANDS

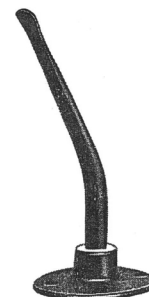

Type C

Type D

Bench stands or spindles are a must in all lasting and making rooms. All types have removable last pins except Type B, not illustrated, similar to Type C.

No.	Type	Height (Inches)
JZS 74	B Straight	4
JZS 76	B Straight	6
JZS 78	B Straight	8
JZS 84	C Straight	4
JZS 86	C Straight	6
JZS 88	C Straight	8
JZS 96	D Angle	6
JZS 98	D Angle	8

TURNING IRONS

JZS 111—Type A—Small size. Height $13\frac{1}{2}$ ".

JZS 112—Type B—Larger—Adjustable for height.

JZS 111—Type A is used largely for turning children's shoes. **JZS 112**—Type B has a maximum height of 24 inches. Width of top on both models is $\frac{7}{8}$ -inch.
