

DRUM HANDLING EQUIPMENT

CRADLE TRUCK MODEL 40

Designed for the standard 55 gal. drum. Mortuff polyolefin wheels. Rugged angle iron construction. Use Model 31 Tipping Lever to assist loading. Available in aluminum as Model 40A.

CAN TIPPER MODEL 15

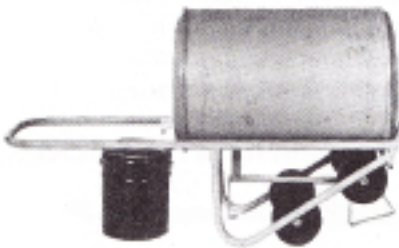

Handles 5 gal. round cans. Safety lock holds container. Dispensing height 10". Ring can be bent to accept square cans.

BOTTLE TIPPER MODEL 18

Holds 5 gal. glass bottle with 2 steel locking straps. Dispensing height 15" with bottle horizontal. Bottle may be inverted.

MULTI-PURPOSE DRUM TRUCK MODEL 160

Now, move and dispense with one convenient hand truck

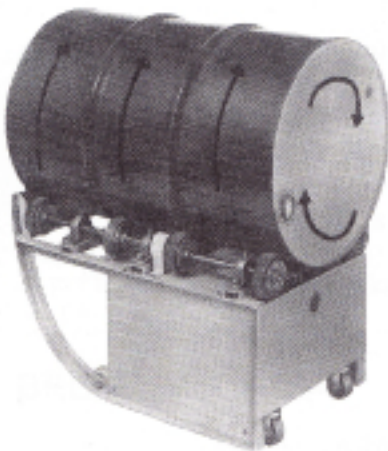

The model 160 truck makes moving and dispensing a breeze! It can also be used to move drums on or off pallets. It's a completely new design for extra safety, ease of use, and versatility. Four equally large 8" polyolefin roller bearing wheels carry the load, no burden for the user. Moves through narrow aisles with hands protected by the u-shaped handle. The extendable support prop allows it to self-stand for storage and stabilizes it in the dispensing position.

BARREL/DRUM STAND MODEL 12

Holds drums of any size 20" above the floor. Welded angle iron frame, folds for easy storage. Requires that drum be hoisted into position.

PORTABLE DRUM ROTATOR MODEL 201

Morse Drum Rotator Model 201 agitates drum contents without opening the drum! Not only does it eliminate build-up in the bottom of the drum but you don't lose important ingredients in unmixed sediment. Mixing in closed drums eliminates many hazards, too. There is no need to transfer messy contents.

This rotator is built to stand just 19-1/4" in height to make loading and unloading considerably easier. The sides and back are enclosed to protect the drive. Factory set speed of 20 RPM is standard. Also available in 10 RPM and 30 RPM speeds.

MODEL 201VS VARIABLE SPEED

Model 201VS designed to allow the user to vary the speed.

DRUM PLUG WRENCHES

No. 61 designed to remove or tighten 95% of drum plugs on the market: head is made of special steel alloy for strength and durability.

No. 61-M is similar to No. 61 but has a non-sparking manganese-bronze head.

DRUM DOLLY MODEL 14

For easy and secure moving of 55 gal. drums.
