

CANS & DISHES

CEMENT KEEPER

Stops waste by keeping any type of adhesive or resinous material at its original high-strength viscosity. Top opening is sealed by a reverse-interior, self-centering cone cover that prevents evaporation by trap-

ping fumes. Inside and outside of cone-shaped section are Teflon™ coated to protect against cement sticking and accumulating. 1/5 gal. capacity.

DRESSING DISH No. 343

Well suited for dispensing liquid economically. The 3-3/4" roll applies a limited amount of liquid to whatever is rolled over the top and the slots in the inclined top act as wipers to remove any excess liquid.

The aluminum grid is removable for easy cleaning and the hard rubber roll is also easily cleaned. Used to apply dressings and inks to sponges or latex adhesive to heel pads. 1 quart glass bottom.

BENCH CANS

The bench can handles larger cloths and parts up to 12" long. Spring-loaded perforated-metal dasher submerges parts, springs up to drain. Red enamel finish. Available in: 1 qt., 2 qt., 1 gal., 2 gal. and 3 gal.

PLUNGER CANS

The best way to handle flammable liquids used in "sponging" and cleaning. Plunger Can has a spring-loaded plunger with perforated-metal fire-baffle dasher. Depressing dasher moistens rag or sponge; surplus drains back into can. 1 qt. nonmetallic can shown. Other sizes: 1 pt., 2-1/2 pt., 1 qt., 2 qt. metallic.

TYPE I SAFETY CANS

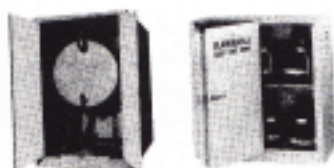

Justrite Type I safety cans are single spout containers well suited for filling tanks or other containers with large receiving openings. The patented convenience handle minimizes fatigue caused by carrying heavy loads. The spout opening is built in. Sizes from 1 pt. to 5 gal. are available.

TYPE II SAFETY CANS

Justrite Type II safety cans have two openings. One for pouring, one for filling. They feature a built-in flexible metal hose ideal for smooth, accurate spill-free pouring into small openings like those you might find in bottles, plunger cans or equipment. Both the Type I and the Type II are available in metal terneplate or nonmetallic high-density polyethylene which provides long, dent-free life. 1 gal. to 5 gal. sizes available.

SAFETY STORAGE CABINETS

A wide variety of cabinets are available for safe storage of flammable liquids in small cans up to cabinets that hold two 55 gal. drums. Yellow finish.

LABORATORY CANS

These convenient dispensing cans with top or bottom faucets are ideal for shelf use or in tilt stands. Available in a variety of sizes in both metallic and nonmetallic, both red in color.
